PROFESSIONAL SUMMARY

Cybersecurity-focused MCA Information Security student with hands-on experience in vulnerability assessment, threat analysis, security governance, and secure application development through internships, practical projects, and CTF challenges. Proficient in Python, networking fundamentals, security tools, and frameworks including ISO/IEC 27001 and NIST CSF 2.0.

EDUCATION

Master of Computer Applications (MCA) – CGPA: 9.04 (Sem 2) 2025 – Present

Jain Deemed-to-be University, Bengaluru

Bachelor of Computer Applications (BCA) – CGPA: 8.3 2022 – 2025

Rajagiri College of Management and Applied Sciences, Kakkanad, Kochi

EXPERIENCE

Networking & Systems Intern – Forerun Systems Pvt. Ltd. June 2026 – July 2026

- Installed and configured IP cameras, PoE switches, NVRs, and access control systems for client environments.
- Built and tested desktop systems, diagnosed hardware issues, and performed system validation before delivery.

Manual Testing Intern – BeaverTech May 2025 – July 2025

- Performed functional, regression, and exploratory testing of web applications, documenting reproducible defects and validating fixes to improve software quality.

PROJECTS

Governance, Risk & Compliance (GRC) Portfolio | ISO/IEC 27001:2022, NIST CSF 2.0, GitHub

- Developed a GRC portfolio for a fictional SaaS company featuring security policies, risk assessments, incident response, business continuity, and compliance documentation aligned with ISO/IEC 27001 and NIST CSF 2.0.

Cyber Jarvis | Python, FastAPI, React.js, Vite, Supabase | <https://cyber-jarvis-news.vercel.app/>

- Developed an autonomous full-stack cybersecurity intelligence dashboard that aggregates real-time CVEs, cyber threats, and tech news using a scheduled Python crawler, stores data in Supabase, and delivers it through a FastAPI backend to a dynamic React interface.

Passive Vulnerability & Reconnaissance Engine | Python, BeautifulSoup4, FPDF

- Automated security auditing engine using BFS crawling to map web app attack surfaces, detect HTTP header misconfigurations, and generate structured PDF remediation reports.

AI-Powered Phishing Email Detection System | Python, Flask, Gemini API

- Built a Flask web tool integrated with Google Gemini API to classify emails as phishing or legitimate in real time.

Bluetooth HID Penetration Testing Toolkit | Android, Bluetooth HID, Java

- Developed an Android-based Bluetooth HID penetration testing tool to simulate wireless keyboard injection attacks for security awareness, physical security assessments, and authorized penetration testing in controlled environments..

Online Marketplace Website | React.js, Node.js, MySQL

- Developed a secure full-stack marketplace application with role-based access control, password hashing, and user authentication using React.js, Node.js, and MySQL.

SKILLS

Security Tools: Burp Suite, Wireshark, Nmap, Nessus, Metasploit, Hydra

Programming Languages: Python, Java, JavaScript, C, C++, PHP

Web Technologies: HTML, CSS, React.js, Node.js, FastAPI, Flask

Cybersecurity & GRC: ISO/IEC 27001:2022, NIST CSF 2.0, Vulnerability Assessment, Risk Assessment, Incident Response, Security Governance

Databases: MySQL, Supabase

Networking & Concepts: TCP/IP, OSI Model, HTTP/HTTPS, DNS, OSINT, Web Application Security, OWASP Top 10, Linux Fundamentals

Tools: Excel, Git, GitHub
