PORTFOLIO: <https://addwin-stephen.netlify.app>

PROFESSIONAL SUMMARY

MCA Information Security student blending hands-on threat analysis and security tool development with formal risk governance. Skilled in vulnerability assessment, incident response concepts, and compliance frameworks.

EDUCATION

Master of Computer Applications (MCA) – CGPA: 9.04 (Sem 2) 2025 – Present

Jain Deemed-to-be University, Bengaluru

Bachelor of Computer Applications (BCA) – CGPA: 8.3 2022 – 2025

Rajagiri College of Management and Applied Sciences, Kakkanad, Kochi

EXPERIENCE

Networking & Systems Intern – Forerun Systems Pvt. Ltd. June 2026 – July 2026

- Installed and configured IP cameras, PoE switches, NVRs, and access control systems for client environments.
- Built and tested desktop systems, diagnosed hardware issues, and performed system validation before delivery.

Manual Testing Intern – BeaverTech May 2025 – July 2025

- Performed functional, regression, and exploratory testing of web applications, documenting reproducible defects and validating fixes to improve software quality.

PROJECTS

Governance, Risk & Compliance (GRC) Portfolio | ISO/IEC 27001:2022, NIST CSF 2.0, GitHub

- Developed a GRC portfolio for a fictional SaaS company featuring security policies, risk assessments, incident response, business continuity, and compliance documentation aligned with ISO/IEC 27001 and NIST CSF 2.0.

CloudCart | GRC Compliance & Vendor Risk Assessment

- Conducted a simulated GRC assessment using selected SOC 2, ISO/IEC 27001:2022 and CIS Controls v8.1 requirements; performed compliance gap analysis, risk assessment, and third-party vendor risk assessment.

Cyber Jarvis | Python, FastAPI, React.js, Vite, Supabase | <https://cyber-jarvis-news.vercel.app/>

- Developed an autonomous full-stack cybersecurity intelligence dashboard that aggregates real-time CVEs, cyber threats, and tech news using a scheduled Python crawler, stores data in Supabase, and delivers it through a FastAPI backend to a dynamic React interface.

Passive Vulnerability & Reconnaissance Engine | Python, BeautifulSoup4, FPDF

- Automated security auditing engine using BFS crawling to map web app attack surfaces, detect HTTP header misconfigurations, and generate structured PDF remediation reports.

Home SOC Lab | Splunk, Sysmon, Windows Firewall, Kali Linux, VMware

- Built a hands-on SOC environment to collect and analyze endpoint and network telemetry, configuring Sysmon and Windows Firewall logging with Splunk Universal Forwarder and using Kali Linux to generate controlled network activity for security event investigation.

SKILLS

Security Tools: Splunk, Sysmon, Burp Suite, Wireshark, Nmap, Nessus, Metasploit, Hydra

Programming Languages: Python, Java, JavaScript, C, C++, PHP

Web Technologies: HTML, CSS, React.js, Node.js, FastAPI, Flask

Cybersecurity & GRC: Risk Assessment, Compliance Gap Analysis, Vendor Risk Assessment, Security Governance, ISO/IEC 27001:2022, SOC 2, PCI DSS, CIS Controls v8.1, NIST CSF 2.0, Incident Response

Databases: MySQL, Supabase

Networking & Concepts: TCP/IP, OSI Model, HTTP/HTTPS, DNS, OSINT, Web Application Security, OWASP Top 10, Linux Fundamentals, Network Security Monitoring

Tools: Excel, Git, GitHub
